Risk Management Consulting Firms(two)
National Insurance Agent
Premier Property & Casualty Ins. Co.

RESUME

Gary's safety career has required him to bring to bear his technical, interpersonal and communications skills to Risk-based clients, including Insurance and Financial related organizations. In his capacity as consultant, Gary has audited risk management programs; studied employee health and safety issues and presented risk management training. As would be expected, these services have been provided to a broad base of Industrial, service, transportation and non-profit companies.

Gary has guided a multitude of safety and industrial hygiene projects, ranging from training and policy development to hazard assessments/ control. Starting as a consultant for a National TPA, the operation grew to a Regional Position, with offices from Chicago to Charlotte reporting to Gary.

Applying his administrative, organizational and technical skills enabled one Fortune 500 client to obtain health & safety audits within two months for 30 different manufacturing sites. For which he won a "Peak Performer" award.

Gary's diverse career has included various assessments for insurance organizations. His emphasis has concentrated upon employee and third party injury preventions, such as:

Liability & environmental insurance assessments for a national MGA with a specialty for transportation risks,

Safety audits of government entities with final reports incorporating an Action Plan and suggestions for improvement of each entity,

Employee safety audit of an 84-mile petroleum pipeline, evaluated safety activities & OSHA compliance.

Since receiving his Bachelor's Degree from King's College, PA, Gary has gone on to obtain his Certified Safety Professional designation and served as the President of the American Society of Safety Engineers, Philadelphia Chapter.
