

# RECREATION SAFETY

---

## Training for Managers, Supervisors, and Team Leaders

### COURSE DESCRIPTION

This instructor-led course is designed for presentation to people responsible for the installation, maintenance and supervision of the use of recreational facilities including municipalities, athletic associations, schools, youth groups and similar organizations.

The course can be tailored for the organization based on its needs. Major types of facilities that can be addressed include:

- Parks
- Playgrounds
- Ball Fields
- Basketball/Tennis Courts
- Swimming Pools

***Key elements of the program are: potential recreational facility hazards, design for safety, facility inspections and related forms, and maintenance requirements.***

The duration of each course presented varies depending on the customization required by the client. Usual presentation time is 2 to 4 hours depending on the modules presented, various type of facilities addressed and type and number of participants.

### OBJECTIVES

Participants in the “Recreation Safety” program will have a better understanding of:

- ✓ *Basic Risk Management Methods*
- ✓ *Potential Hazards of Recreation Facilities*
- ✓ *Equipment Selection, Installation and Maintenance*
